To whom it may concern,

I am writing this reference at the request of He Feifei, who is applying for the ACT2019 adjoint school.

I have known He Feifei since 2016, when she enrolled in a master's program in Institute of Logic and Congition at Sun Yet-sen University. I first met her when she jointing my course Computability. Then we have more scientific communications. Under my suggestions, Ms. He has read some literature on quantum computation, quantum logic, and categorical theory. In 2018, she transferred to a Ph.D program and has started doing research under my supervision. She is interested in quantum computation, complexity, and category theory. Her Ph.D research will focus on quantum program verification using category-theoretical tools, and she is also exploring the possibilities of applying category theory to other related topics.

He Feifei is an intelligent and enthusiastic student and I highly recommend her as a participant of the ACT2019 school. Please feel free to contact me if more information is required. Thank you very much for considering her applications.

Yours sincerely,

Regards,

Xishun Zhao
