#### ACT 2019 Application

Mutsuhisa Ban Ph.D. candidate, The University of Tokyo, Japan

#### An explanation of any relevant background you have in category theory or any of the specific project areas

At ELLSSI 2017, I took the three class below:

- 1. "Categories proofs and programs" by Samson Abramsky and Nikos Tzevelekos
- 2. "Picturing Quantum Processes" by Bob Coecke and Alex Kissinger
- 3. "Introduction to Categorical Compositional Distributional Semantics" by Dimitrios Kartsaklis and Martha Lewis

#### The date you completed or expect to complete your Ph.D

Septemter 2019

## One-sentence summary of its subject matter.

Formal epistemology on the foundation of game theory

#### Order of project preference

- 1. Professor David Spivak "Toward a mathematical foundation for autopoiesis"
- 2. Professor Tobias Fritz "Partial evaluations, the bar construction, and second-order stochastic dominance"

## To what extent can you commit to coming to Oxford (availability of funding is uncertain at this time)

I am applying for the foreign trip grant provided by the University of Tokyo, which can cover full expenditure to participate this Adjoint School.

### A brief statement on why you are interested in the ACT2019 School.

I am working on the game theory and formal epistemology and wish to investigate them via category-theoretical approach. I am also interested in the series of work conducted by Dr Jules Hedges so this is a very precious opportunity for me.
